

A Rotary club at Helensville

Why the Rotary Club of Henderson?.

- Helensville and the west of Auckland is a rapidly growing area. With new housing areas being developed to meet the expanding Auckland area.
- Rotary being a long established service organisation with 36,000 Rotary clubs throughout the world has an obligation to fill the service needs of local communities. Helensville does not currently have a Rotary club.
- Presently the Rotary club of Henderson has a presence in the west in supporting the Muriwai Life guard service along with other service organisations in the area.
- The Rotary Club of Henderson is a big club with a membership approaching 70. Recently we chartered a Satellite club situated in Te Atatu; all of whom are younger members that have commenced doing projects including development of Ranui Community Gardens and restoration of a school garden in Massey .
- With that group established it is time for the club to look at areas where the greatest need exists.
- While Helensville has service organisations that fill some of the needs, Rotary and the membership of the Henderson Rotary club are keen to establish this satellite club to further help the community.
- The members of this new club will decide what needs to be done when and where they meet and all of the things that make up the culture of a service club.
-

All of this will be done with the help and resources of the Rotary Club of Henderson.
